Introduction

I have pleasure in presenting my new catalog, and take this opportunity of thanking all customers for their kind support and recommendation to others. For years I have had a private rock garden and have imported and collected rock plants and alpines from all over the world. It was not until five years ago that I decided to grow my plants on a much larger scale so that I might accommodate those visitors and friends who were real rock garden lovers, but who had not the facilities of obtaining those things that I had long in my possession. Consequently this business has grown by such leaps and bounds that I find it has taken all my time and that of several assistants to keep up with it, until at this time I am endeavoring to collect and import only the best known and most attractive plants for the rock garden, trying first and then casting out all those varieties that I consider worthless and of nondescript character. and endeavoring to obtain only the best and choicest of each variety. Furthermore, I keep each year only the very finest specimens to propagate from, insuring a future stock of rare quality.

There is probably no branch of horticulture so full of interest and so rich in return of pleasure as the Alpine Garden. Hardly a garden of no matter how small a dimension but can boast of some sunny corner that would be suitable for a little rock garden in which to plant wee treasures.

The greatest importance should be attached to the kind of rock chosen and the soil intermixed therewith. Choose well weathered rocks of good appearance and place them in such a manner that the water will run back into the soil. The pockets should be large enough to receive several plants of the same variety, so that the whole effect when finished will not be spotted. The plants should be kept moist in summer, with good drainage, and have a top dressing in the spring of sand and leaf-mould well mixed with grit. If small evergreens are interspersed here and there in the rockery it aids to alleviate the monotony in the winter months when all bloom is past, and bear in mind that only plants of harmonious color values should be planted near each other in the rock garden.

A plant may be in good condition when received but it takes a thorough preparation of the soil at all times to make them

thrive and continue to maintain their vigorous growth.

I have both field and pot-grown plants, and can supply most of these in either form. Many prefer field-grown plants, considering them more hardy. Personally I believe and especially for Eastern trade, pot-grown plants are best as the roots are well maintained and seem to withstand packing to better advantage.

I keep hundreds of saxifrages, androsaces, sedums and sempervivens in pots plunged in sand pits, along with other of the more valuable rock plants and alpines, and can supply them in quantities at short notice; and by the way, although I have not tabulated the price list of plants by the dozen or more, I can give a much better price at this rate, always being able to supply a dozen at the rate of ten, and in some instances doing even better. I make a specialty of rock wall planting, growing quantities of those plants that are especially adapted for that form of rock gardening, also I am well equipped to landscape and give advice with regard thereto.

Shipping

Every care is taken to see that plants are dispatched in firstclass condition and I can assume no responsibility for damage in transit. Any error of mine will be rectified as far as possible by replacing the plants, or refunding the costs.

I shall send, unless otherwise ordered, all plants by parcel post. Purchaser to pay postage and insurance, excepting retail orders amounting to \$1.00 or more for Pacific Coast delivery.

FALL SHIPPING SEASON begins the first week in September and extends usually until about the first week in November,

according to weather conditions.

SPRING SHIPMENTS are forwarded according to customer's wishes and subject to weather conditions, March 1st until June 15th. It is well to order early in order to avoid disappointment.

LIST of NOVELTIES and NEW ITEMS

ACHILLEA MACEDONICA. Choice little alpine marguerite	30.40
AUBRETIA GLORIOSA. Beautiful new hybrid	.50
ALYSSUM IDAEUM. A treasure for the rock garden, quite prostrate, with silver-green leaves and soft yellow blooms	.35
Spinosun (Ptilotrichum spinosum). Choice, dwarf little shrublets covered with sweet scented blooms of dainty white	.50
Spinosun. Rosea, choice rose form of the above	.50
ARENARIA, purpurescens. Light lavendar form of the old favorite	.50
ASTER. Choice species from Mt. Garibaldi, British Columbia	.35
Acris. Forms low-growing bushes covered with tiny lav-	.75
Thompsoni. Nana, daintiest little Michaelmas daisy for the rock garden, very choice	.75
CAMPANULA, EXCISA. Quaint perforated harebells of the daintiest blue	.75
Fenestrella, on the order of Erinus and Garganica, count- less pale blue starts in June-July	.50
Glomerata, Nana. Cluster bells of deep purple	.40
Istriaca. Wide open stars, not unlike C. Garganica	.40
Laurii. Pale lavender blue, stars on eight-inch stalks Pseudo-Raineri. Hybrid between CC. Raineri-Turbinata. Salver-shaped leaves and lovely purple bells	.35
Raineri. Beautiful specimen from Italian Alps, China	.50
Blue flowers; appreciates a little shade	1.50
Steveni Nana. Beautiful little mat-forming species, appreciates a cool, moist place	.75
Standsfieldi. Choice creeper of rarest charm, deep purple bells	.75
Thommasiana. Diminutive and choice wee campanula for partial shade	.75
Zoysii. Choice moraine campanula, partial shade. starva-	
tion diet, stock limited	2.00

CONVOLVULUS CANTABRICUS. Beautiful little Convolvulus from Southern Europe, with rosy pink blooms, very dainty	.75
CYTISUS (Dwarf Brooms) ARDOINII. Lovely rare wee plant, choicest little broom for the rock garden. May-	
June	1.25
Dalmatica. Quaint little gorse, of rarest charm	
	1.25
Nigricans. A splendid late blooming broom, grows two	- 00
or three feet, but quaintly beautiful in rock garden	1.00
Purpureus. Lovely arching sprays of deep lavendar in	1.00
May; choice	1.00
and quaint wee blossoms; a treasure	1.25
Radiata. Choice little Genista, of quaint habit and sil-	1.20
very foliage	1.25
Uralensis. Splendid broom for hot location	1.00
DELPHINIUM, Cashmeriana. Choice dwarf Chin Delphin-	
	1.00
Pylzowii. From Kansu, China, beautiful violet-blue flow-	
ers, choice asset in rock garden	1.00
Tatsiense. Rare Chinese delphinium of quaint azure	1.00
blue, graceful and effective	1.00
flowers	.75
Callizonus. The choicest of Alpine pinks, a treasure	
among treasures, large flowers in the form of Alpinus,	
lighter pink, spotted white. Stock limited	1.25
Crinitus. Daintiest little pink imaginable, soft fringy	
white blossoms	.50
Freynii. Bluish-grey cushions upon which sit the quaint-	
est little blossoms of delicate pink, lovely for moraine	.50
Glacialis. This is a good form of glacialis, and a beauti-	
ful clear pink bloom	.50
beauty, ample purple-pink blossoms	.50
Microplepsis. Similar to above, a very choice dianthus	.50
Squarrosus. Dainty white feathery pinks, mistiest charm	.50
Subacanlio. Very choice grey mats, delightful little pink	100
bloggomg	50

DOUGLASIA. Douglasia Laevigata, a Western native of green rosettes, carrying the daintiest little rich rosy bloom with yellow eye	.40
DRABA. Aizoides. Neat little tuffets of light green clothed in wee golden blossoms in earliest spring	.35
EDRIANTHUS. See Wahlenbergia.	
HELIANTHEMUM. Choice double yellow	.50
Choice double orange	.50
Ruby Knight. A delightful shade of deep ruby, choice	.00
large blooms	.75
ERIGERON, Alpina. Very choice little alpine daisy	.50
Compositus. Daintiest little alpine daisy, a treasure in	.00
the rock garden	.75
the rock garden	.40
EPILOBIUM, Obcordatum. Alpine gem from Rockies, brilliant rose	.40

more and the contract of the printer of the printer of the contract of the con	

MERTENSIA, Eichoides. Choice little deep blue bells, a
real gem
Pulchellum. Dainty Western native, a miniature M. Virginica
Nutans. Similar to above, but even better
MIMULUS, Bartonensis (Lewisia x Cardinalis). Choice
mixed colors
MORISIA HYPOGAEA. Tiny yellow-flowered gem from Corsica
ONOSMA, Albo-Roseum. Silvery foliage, flowers white and rose, rare and choice
OURISIA Coccineum. Beautiful scarlet-flowered creeper for moist location
OXALIS MAGELLANICA. Wee white flowered Oxalis of rarest charm
POLEMONIUM, Carneum. The flesh colored Polemonium,
native of our mountains
A deeper pink hybrid, this is a very choice one
Confertum. Rare Western native of great beauty, blue75
POTENTILLA FRUTICOSA FARRERI. Choice little shrub- let from Thibet, covered with dainty yellow roses for
weeks at a time
Nevadensis. Grey green tufts from the Sierra Nevadas,
a real little Western treasure
PRIMULA, Anisadora, Wardii, Wanda, Capitat Mooreana,
Minima, etc50c and up
SAXIFRAGA, Marginata. Beautiful lime-pitted rosetts,
dainty fragrant blooms in early spring
Myra. A new dwarf Saxifrage of rare beauty, deep rose
blooms, a departure in Saxifrages
new ones 1.25
Riverslea. Wee silvery tuffets, rose flowers. This also is
something new in Saxifrages
Scardica. Splendid new hardy grey foliaged Sax., lovely
white blooms 1.25
Ajugafolia. A wee mossy of the rarest charm, appreciates moisture

including Schotti, Comolli, Accuminatum, Wulfenium, Fimbriatum, Funckii, etc	.30
THYMUS NUMMULARIA. Large leefed creeper good FRAGMENTAIRE. Very fragrant little Thyme for step-	.40
ping stones	.35
grey foliage	.75 .50
GENERAL LIST	
ACAENA (Rosaceae)	
Argentea. Neat little carpets of silver grey\$	
Buchanani, Dense carpets of pea-green	
Nove Zealandie. The smallest and most desirable. Wee	.30
bronzy leaflets	.40
ACHILLEA (Compositae). Yarrow or Millfoil. Those with silver grey foliage being especially desirable. Ageratofolia (See Anthemis Aizoon).	
Clavennae. Neat silvery foliage from the limestone cliffs of the Karawanken. White flowers, bronze center.	40
This is choice and quite uncommon	.40
flattish heads. Hot sandy soil	.30
AETHIONEMA (Cruciferae). Most desirable and satisfactory rock plant for a hot and sunny location.	
Coridifolium. Many stemmed bushling with small dense	F0
heads of pink. June-July	.50
with soft clear pink blooms	.50
Warley Hybrid. This comes from the genuine and orig-	.00
inal imported stocks from England. A very choice	
and easily grown little plant in full sun, with desirable grey foliage and lovely soft pink flowers	.75

AJUGA (Labiatae). A neat little plant for a shady corner, lovely with Lamium and the Arabis Flora Plena. Genevensis. Gentian blue flowers in early spring
Genevensis. Gentian blue flowers in early spring25
ALYSSUM (Cruciferae). The common Gold Dust is found in most gardens. I wish to mention a few of the less common kinds:
Alpestre. Quite prostrate with minute yellow flowers, and very desirable grey foliage
Argenteum, Silver foliage with dense flower heads blooming in late summer
Moellendorfianum. Attractive variety from Bosnia. Silver foliage and yellow blooms from June until Aug 3:
Saxatilie Citrinum. The pale yellow blooms being espe- cially soft and pretty with the early mauves and
lavenders of the Aubretia
tinuously for weeks. Compact and lovely
ANDROSACE (Primulacae). A genuine Alpine from high elevations, appreciating warm situations with plenty of small rock chips, and sandy soil.
Brigantiaca. A variety of Carnea. Pink blooms
Laggeri. Choice variety from the Pyrenees. Neat and very uncommon. Juniper like foliage
Lactea. Delightful little compact rosettes with clusters of lovely white blossoms in June and July
Lanuginosa. One of the most beautiful. Silvery foliage with soft pink lilac-pink blossoms blooming nearly all
summer
Primuloides. Rosettes of silvery foliage and heads of rose blossoms on three-inch stems. May-June

and carmine eye. This is different
Sempervivoides. Similar to above with smooth foliage and more compact, and deep pink flowers
and more compact, and deep pink flowers
lovely pink blossoms

Villosa. Tiny rosettes of wooly foliage with the choicest little pearly-white forget-me-not bloom with yellow	0.0
	00
Vitaliana (Douglasia Vitaliana). This is a yellow-blooming Androsace, close green mats with flowers of the softest gold. Very lovely	.75
ANEMONE (Ranunculacae)	
Blanda. Attractive blue blossoms, in snow-drop time. Plant bulbs in the fall. \$1.50 dozen. Each	.15
	.15
Hepatica Triloba. Pink and blue dainty blossoms	,35
Pulsatilla. Large mauve or purple flowers, ornamental	.40
ANTENNARIA (Compositae)	
Rosea Nana. Silvery compact foliage, dainty pink flower	
heads. Good ground cover	.25
ANTHEMIS (Compositae)	
	.35
AQUILEGIA (Ranunculacae). Columbine.	
Alpina. Large powder blue flowers on stems 12-14 inches	.40
Flabelata Nana. Choice little white dwarf Columbine	.00
	.40
Pyraneica. Rare and beautiful. I consider it the choicest of them all. Much like A. Alpine, more intense blue, and more dwarf.	.50
ARABIS (Cruciferae). I have a number of varieties, among	.00
	.25
	.40
ARENARIA (Caryophyllacae)	
Montana. Large white flowers, very fine for rock wall,	25
	.35
Balerica. Carpeter with dark green foliage and minute	0-
	.35
ARTEMISIA (Compositae)	0.0
Frigida. Lovely soft grey foliage	.30

Baumgartneri	
Canescens	
RMERIA (Plumbaginacae) Bee's Ruby. Dark Rose Laucheana. Clear Pink	cush-
ASTER (Compositae) Alpina. Large violet and gold daisies in June Alpina Alba. The white variety of the above Lichangensis. A very choice Chinese aster, dwar branched with many blooms of the loveliest in mauve, with dark eye	f and atense
Goliath. Large beautiful lavender, with intense yenter Pliades. Dainty foliage and branching habit. A comes late when bloom is scarce. Farreri. Western China Alpine. Handsome foliag large mauve blooms with intense yellow center. Sub-Coeruleus. Larger Aster Alpina. Yunanensis. Choice aster from the Yunnan. One best. Blooms in July-August.	e and
STILBE (Saxifragacae) Simplicifolia. This from Japan. Lovely dwarf a foliage with the most delicate spirea bloom in able. July-August	nagin-
MUBRETIA (Cruciferae). I have beautiful grand mixed varieties, but also have the followed at select varieties, in nice large plants	named

Bridesmaid. Loveliest soft and delicate pink
BELLIS (Compositae) Minutum. Smallest dainty daisy imaginable, constant bloomer, and a good companion for the lovely Viola Bosniaca
CALTHA (Renunculacae) Leptosepala (our native Marsh Marigold). Lovely waxen bloom with yellow center
CALCEOLARIA (Scrophulariacae) Polyrhiza. Dainty little plant for moist places, lovely lemon yellow blooms Umbelata. Choice little treasure from Peru. Very dwarf and of the richest carmine imaginable. Hot and sunny location
Bonfire. Rich scarlet, speckled with brown CHEIRANTHUS (Cruciferae) Linifolia. A dainty mauve cushion with sweet smelling wall flower blooms Pumillum. Very dwarf, and orange fairy wall flowers
CAMPANULA (Campanulacae) Aucheri. Large rich purple bells on three-inch stem. very choice and rare. Needs protection in winter Elantines. Grey leafed trailer, with dainty China blue blossoms Collina. Lovely species from Caucasus. Foot-high branching stems, with deep purple bells. June-July Barbata. This is the bearded bellflower of the high Alpine meadows, combining wonderfully with Hiericum or the late blooming Alyssums Garganica. Beautiful dainty blue stars, most consistent and satisfactory bloomer. Need sun, June-July
Garganica W. H. Paine. Larger blooms and more spreading tufts. Very choice

	Carpatica Isobel. Choice China blue saucer on lovely hairy stems and foliage	.35
	Carpatica Riverslea Beauty. The loveliest Carpatica, comes late and the richest blue	.35
	Carpatica Alba. The white variety of the above Hallii. Dainty white Campanula, resembling the white Pusilla	.50
	Isophylla (Blue). Silver grey foliage which is beautiful in itself; lovely blue stars in July-August. This is a treasure. Needs some protection from winter rains	.50
	Muralis. I have both the Portenschlagiana and the Bavarica type. Lovely blue trailer, long bloomer	.38
	finds. Not unlike Caespitosa and Pulla. The tubby little bells entirely cover substantial mats of lovely	75
	Norman Grove. The choicest little dwarf cup of the daintiest China blue. I consider this one of the best of	.78
	the recent hybridizations. July-August. Some shade Pusilla. Dainty little nodding bells on two-inch stems	.75
	Pusilla Alba. Lovely white form of the above	.35
	Raddeana. This is a good Campanula from the Alps of the High Caucasuses. Branching from the Alps of	٠Δ١ و
	deep purple bells. June-August. Full sun	.40
_	little wide open bells, hairy foliage	.75
_	shade.	.35
	Cheilanthifolia. Fern-like foliage and clear yellow blooms Thalrictifolia. Dainty foliage, pale yellow flowers, dainty	.35
0	Mauritanica. Dainty delf-blue trailer, is not rampant, and very choice. Half hardy, needing protection in winter	.50
0	TONEASTER (Rosacae) Adpressa. A dwarf, close growing shrub. Lovely glossy	
	leaves, turning in the fall	1.00

C

C

Humifusa. One of the best shrubs for rock covering. Beautiful leaves and profusion of white hawthorne blossoms in early spring	1 00
Tymeifolia. Daintiest foliage of all. Choice	1.00
Squalida. Wee fern-like foliage, splendid for stepping stones or between steps	.35
DAPHNE (Thymelacae)	
Cneoreum. Garland flower. A lovely little evergreen bush which clothes itself in spring with the most delicious and fragrant rosy trumpets	
Large plants	2.50
DIANTHUS (Caryophyllacae)	
Alpestris. Little fringed pink blooms	
Arenarius. Lovely blush lilac fringed flowers	.35
very dwarf. Deep rose pink	.50
Alpinus Carmineus. This is an especially fine carmine bloom with deeper carmine eye. Very choice	.75
Alpinus Alba. The white form of the above. Very dwarf	.50
Arvenensis. The daintiest and smallest Caesius. Grey	4.0
green compact mats with choice pink blooms Deltoides. Major Stearn's variety. Bronze foliage, deep	.40
carmine flowers	.35
Hungaricus. Dwarf little mottled pinks. New, and a gem Neglectus. The choicest of the Dianthus. Cherry-rose	.45
blooms with buff reverse, very dwarf. Rare	.75
Alwoodi Alpina. Deep carmine pinks with spicy fragrance, covered with blooms for weeks	.40
Gladys Cranfield. Similar to above, rich pink with deep carmine eye	.50
Napoleon III Rich ruby red. An indescribably lovely Dianthus. The most gorgeous coloring imaginable	.75
Plumarius Hybrids. Many colors, fragrant and good	.30
DRYAS (Rosecae)	
Octopetala. Compact and charming little dwarf shrub. Makes neat carpets of wee oak leaves and throws up	
dainty waxen flowers of creamy white. Choice	
Sundermanii. Larger and looser, just as good	.50

ERICAS. Special list upon request.	
ERINUS (Cruciferae)	
Alpinus Carmineus. Lovely rose-colored variety. Splen-	
did for walls, stepping stones and crevices	.35
Alpinus Alba. The white form of the above	.35
ERODIUM (Geraniacae)	
Cheilanthifolia. Beautiful grey foliage, white bloom with purple blotch. Blooms for weeks	.75
Chrysanthum. Grey foliage with dainty yellow blooms	.75
Maoradeum. Much like the above with blush pink flowers	.75
ERYTHRAE (Gentianacae)	
Diffusa. A lovely wee gentian-like plant, leaves hidden	
with a profusion of lively bright pink stars	.75
EPIMEDIUM (Berberidacae)	
Niveum. Snow-white flowers, beautiful heart-shaped foliage	= (
Sulphureum. Dwarf, pale yellow flowers, bronze foliage	.50
GENISTA (Leguminacae). Broom, sandy loam.	.0(
Prostrata. Dwarf creeping broom, woolly foliage. Choice	.60
Sagittalis. Peculiar jointed foliage, interesting and at-	.00
tractive low growing shrub	.75
Tinctora. Lovely warm colored yellow dwarf shrub	1.00
Tinctora Flora Piena. Double form of the above. Very	
choice	1.25
GENTIAN (Gentianacae)	
Acaulis. This is the favorite. Large rich blue trumpet, a marvel of color in May-June. Choice plants	1.00
Dahurica. Large leaves and flopping stems, carrying	1.00
large umbels of deepest blue	.78
Farreri. Large lovely sky-blue trumpets surrounded with	
grassy foliage. One of Farrer's choicest finds in	
Thibet. July and August 1.00 &	1.50
Lagodechiana. A beauty much like Septemfida. Low	1 00
growing Gentian with large spotted trumpets	1.00
stems with cluster of lovely blue-purple bells. Sept	1.00
Sceptrum. Native Gentian similar to above; smaller	.75
Septemfida. Beautiful fringed bells in clusters of the	
brightest blue. July and August	.75

Verna. Lovely spring Gentian. Bright blue stars with white center. April-May. Very choice and rare	1.50
Sino-Ornata. This I consider the finest of the Chinese Gentians. Blooms in the late autumn when flowers are scarce. Most intense blue. A choice plant	1.50
Walujewi. White, spotted brown. Peculiar specimen from India. June and August. Large plants	.75
ERANIUM (Geraniacae) Argenteum. This is a delicate little gem. Silver grey foliage with apple-blossom pink blooms. If given too hot a situation will fade out	1.00
Traversi. Lovely grey-green foliage with clear pink blooms. Lovely with Convolvulous Mauritanica	.75
Sanguineum. (Lancastriense). Low growing prostrate type with pale pink delicate blossoms	.50
Pylzowianum (North Thibet). A dainty little sprite with nodding rose-pink blossoms. June-August	.75
for warm location. August-September	.75
Borisii. Bright orange-scarlet flowers on short branching stems. June-August	.50
little orange blossoms. Quite dwarfLOBULARIA (Selaginanczaea)	.50
Cordifolia. Tiny prostrate shrub covered in early June with tiny fluffy blue balls	.50
Nana. Similar to above, but much more minute and pros- trate	.50
YPSOPHILA (Caryophyllacae) Cerastoides. Choice grey-green foliage with large white cup veined purple	.35
Repens. Dainty foliage with fairy blooms of palest pink. B. Repens Rosea. Rose form of the above	
ELIANTHEMUM (Cistacae) Speciosa. Orange and salmon, large leafed and very fine	.50

G

I have also fine pinks with grey foliage, roses, yellow singe, and double, white with grey foliage (good), reds, single and double. These are all good, but mixed names	.25
HEUCHERA (Saxifragacae)	
Brizoides. Lovely shade of rose coral bells	.40
Sanguienea. Coral red bells	.35
Alba. Dainty white bells	.30
La Perie. A new red coral bell	.50
Pluie de Feu. Very fiery red	.40
Rosmondi. New. Delightful shade of pale pink	.60
Gracillima. Dainty pink semi-double	.40
HUTCHINSIA (Cruciferae)	
Alpina. A true little Alpine with deep green foliage cov-	
ered with dainty white flowers in early spring	.3!
HYPERICUM (Hypericacae)	
Coris. Dainty little plant with very fine foliage and	
branching stems, lovely yellow blossoms. July and	
August. Partial shade	.4!
Polyphyllum. One of the best. Dense little bushes cov-	
ered with large yellow cups all summer	.40
Repens. A splendid covering for a large rock, in a sunny	
location	.35
Fragile. Somewhat like Polyphyllum, but finer and	
daintier	.40
BERIS (Cruciferae)	
Sempervivens. Good perennial rock-plant. White	.2
Gibraltica. The same as above, but dainty lavender	.35
RIS (Iridicacae). I carry a number of dwarf iris, but list	
a few of the most choice. I have all the pumillas at	.25
Arenaria. The dainty little golden sand Iris. This is	
scarce and very choice	1.25
Cristata. A creeping Iris of great beauty. Old blue and	
yellow. Prefers a little shade and moisture	.35
Gracilipes. The choicest and daintiest of all the Dwarf	
Irises. Many miniature little blooms like small Jap-	
The state of the s	1.25
Tenas. Lovely native sort	.50
Tenuis. Another choice little native Iris that deserves to	-
he hetter known Vellows and blues	.50

Tectorum. The roof Iris of Japan. Splendid wall Iris Verna. Vernal Iris, good ground cover Reticulata. Imported choice Dwarf Iris bulbs.	
LEWISIA (Portulacaocae)	
Howellii. Beautiful native of Oregon. Lovely crinkled	
foliage. with radiating head of apricot flowers streaked with rose, on three or four-inch stems. Very gritty	
soil, good drainage and full sun. You will consider	
this the finest rock plant in your garden. June-	
August	.75
Rediviva. Queer little plant which completely dies down	
and then throws up a glorious satiny pink or white	
bloom of the rarest tints	.35
Finchi. Much like Mowelli, but broader and more suc-	- 50
culent leaves. Blooms very similar	.50
Tweedyii. This is the most beautiful of all. Lovely	
green foliage which throws up a glorious bloom re-	
sembling a miniature waxen water-lily	1.00
LINARIA (Scrophularicacea)	
Linaria Alpina. Dainty little lavender and yellow, or	
pink and yellow snap-dragons. Very choice	.35
LINUM (Linacacea)	
Alpinum. Dainty little flax of the clearest blue	.60
Salsaloides. Paler Mauve and streaked lavender	.75
Viscosum. Dainty plant throwing up a large single pink	- 00
bloom. Good and late bloomer	1.00
LITHOSPERMUM (Boraginacaea)	
Gramnifolium. Dainty little shrub, with pale blue dif-	
fused pink blossoms. Choice	.75
Petraem. Much like the above. Longer foliage and more	
intense blue. July-August	.75
Prostratum. Choice rock cover. This is the delight of	
my rock garden. It blooms from February until De-	-0
cember, Gentain blue blossoms	.50
Prostratum. Heavenly Blue. A sky blue form of the	-
above	.75
LOTUS (Leguminosae) Corniculatus. Lovely little rock cover for a partially	
shady corner. Nice little pea-shaped flowers of clear	
yellow in early summer	.40
yenow in early summer	.40

Corniculatus Flora Plena. Double form of the above.	.75
MALVESTRUM (Malvacaea)	
Coccineum. Lovely grey cut-leafed foliage with the most	
satisfying flame colored tufts of silk, July.	.50
MAZUS (Scrophulariaceae)	
Rugosa. Lovely creeper for stepping stones or between rocks. Minute lavender flowers like a wee orchid. A	
choice little affair	.40
MERTENSIA (Boraginacaea)	
Virginica. Beautiful sprays of China-blue bells. Lovely with the native mimulus	.35
MIMULUS (Scrophulariacae)	
Lewisia. Beautiful native pink mimulus	.50
Lewisia Alba. The lovely white form of the above. Rare	
Langdorfii. Native yellow mimulus, creeper and quaint	.25
Cardinalis. Bright scarlet flower	.50
MYOSOTIS (Boraginacae)	
Pallustris Fl. Pl. This is a superb form of the forget- me-not. Good for water margins, or as ground cover	
for Iris	.35
Rupicola. The choicest of the class. Hairy leaves	.75
ONONIS (Leguminacae)	
Cenisia. Dainty little apple blossom pink peas on minute	
little shrub. Choice	1.00
Rotundifolia. Larger and deeper pink	.75
ONOSMA (Borraginacae)	
Tauricum. The lovely Golden Drop. Wide masses of	
narrow, grey green foliage, from which in Summer	
dainty trumpets of clear lemon yellow appear, sweet-	
ly almond scented. Hot situation	1.00
OMPHALODES (Borraginacaea)	
Cappadoccia. Handsome dwarf plan with large forget-	
me-not like flowers of the rarest blue. Prefers a little	-
shade	.75
Verna. Much like the above, but choicer and daintier	1.00
OXALIS (Geraniaceae)	
Adenophylla. A beautiful Chilean mountain plant. Pro-	
fusion of lovely grey-green leaves throwing up dainty	1 05
blooms of the softest lilac-pink	1.40

Enneaphylla. The glory of the Falkland Islands. Similar to above, with waxy white flowers	1.25
Floribunda Rosea. The old favorite. Umbels of rose blooms all summer long. Appreciate a little shade	.40
AROCHETUS (Leguminosae) Communis. Native of East India, but is perfectly hardy in moderate temperatures. Carries far into the Win. ter beautiful pea-shaped azure flowers on two-inch	1.00
stems. Creeper shade	1.00
ENSTEMON (Scrophulariacae) Acuminatus. Gray foliage, gentian blue flowers	.50
Acuminatus Alba. White form of the above	.50
Barrettae. Choice native of Oregon. Silvered foliage	
with the most glorious lilac snapdragon	.75
Confertus purpureo-coeruleus. Dwarf speces from Ore-	
gon, mat like habit. Purplish blue flowers in late summer	.50
Fruticosa. Also Oregon native of great beauty	.75
Menziesii. Evergreen dwarf woody plant with large pur-	
ple snapdragons. Choice	.50
Heterophyllus. Choice violet-blue with pale blue throat	.35
Procerus. Masses of glorious gentian blue heads on very ample stems and lush foliage. 12-14 inches	.35
Rattani Minor. Dwarf heads of blue-lavender flowers	.35
Rupicola. The choicest of the penstemons. Delightful	
cherry-red blossoms with grey-green foliage50 &	1.00
Scouleri. Evergreen low bushes. In May and June lovely spikes of large lavender snapdragons	.75
Scouleri Alba. Choice form of the above. Very fine	
PHLOX (Polemoniacae)	1.00
Amoena. Low-growing plant with large pinkish-lilac	
flowers	.25
Adsurgens. This is one of the best native phloxes	.50
Divaricata. The early blue phlox. Good with the early tulips, About 10-12 inches high	.35
Diffusa. Our finest native phlox. Creeping mats of	.00
lovely pale mauve and lavender blossoms	.40
Stolonifera. Creeping phlox, Eastern native	.35
Sublata. Creeping masses forming sheets of color in	

F

early Spring.
Nivalis. White
Frondosa. Pink with deeper eye
G. F. Wilson. Soft lilac.
Lilacina. Light mauve, deeper ring in center
The Sprite. Soft lavender
Seraph
Seraph The Brde. White with pink eye
Vivid. Beautiful bright rose. The best
PHYTEUMA (Campanulacaea)
Orbiculaire. Graceful balls of blue on dainty stems
Scheuzeri. Similar to above. Taller
PLUMBAGO (Leadwort)
Larpentae. Valuable for color n Fall. Gentian blue
blossoms on folage turning deep bronze. October
POLEMONIUM (Polemoniacae)
Humile. Dwarf, with grey foliage, dainty blue blossoms.
This is the true alpine sort
Reptans. Larger in every way, umbels of bright blue
florets. Lovely with early spring bulbs
Pulcherrimum. Similar, but with the choicest of China
blue blossoms
POLYGONIUM (Polygonacaea)
Affine (brunonis). Carpeting plant, evergreen foliage,
turns bronze in fall, spikes of rose in August and
September
Vaccinifolium. Choice little creeper, lovely to cover a
large rock. Throws up the daintiest little spike of
soft pink in the late fall
POTENTILLA (Rosacaea)
Aurea. Quite dwarf, with yellow blossoms
Cinerea. Compact grower, large yellow flowers
Willmottae. Deep crimson, grey foliage
Nitida. The choicest of the Alpine Potentillas. Silver
grey foliage, beautiful in itself, with the most gor-
geous rose bloom1
Tonguei. Choice bi-color. Dwarf and awfully good
PRIMULA (Primulacae)
I have many of this specie, but list a few of the best.
Beesiana. Bog plant with large purple blossoms

Bulleyiana. Similar to above, with buff orange flowers Cashmeriana. A really beautiful kind with lilac blooms Cortusoides. Soft crinky leaves with rose-lavender	.75 .35
Hellenae. One of the best obtainable of the dwarf grow-	.50
ing species. Similar to Juliae	1.00
Juliae. Choice little dwarf primula of the rarest coloring deep purple with yellow center	.75
Capitata. Lovely spreading foliage and dark purple	.50
Farinosa. Dainty little bird's foot primula, dainty little	
pinkish-lilac flowers	.50
Veris. True blue. A charming blue primrose	.50
Japonica. Mixture of lovely shade of rose and pink, in	1
whorls along the stem. Very effective in early spring Sikamensis. Dainty little yellow-cupped Primula. Mois-	.50
ture	.75
ULMONARIA (Borraginacae)	
Angustifolia Azurea. Low growing herbaceous plant with	
numerous deep blue flower heads in early Spring. This is a most acceptable early harbinger, the first	
of the season	.35
Pyrenaica. Dark green crinkled foliaged plant of prim-	
ula family, with glorious lavender bloom. For shady	
and moist places in rocks	1.00
APONARIA (Caryophyllacae) Ocymoides Splendens. A good pink bloomer to combine	
with the early spring aubretias	.35
AXIFRAGA (Saxifragacaeae). This is perhaps the largest	
race of alpines. Mostly all are quite dwarf, requiring a hot situation, and sandy and gritty soil, with the	
exception of one or two, which are shade loving.	
I name these in the sections to which they belong.	
ABSCHIA SECTION:	
Apiculata. Mats of spiny foliage, primrose yellow blos-	.40
somsin earliest spring	.40
blooms in early spring. A little gem	1.00

S

S

	Burseriana, Sulphurea. Glorious little plant with little yellow blossoms in early spring
	Burseriana. Magna. Similar to above. Large white blooms
	Elizabethae. Small cushions of grey foliage, ample blossoms of pale yellow
	Ferdinana-Coburg. Grey-green rosettes similar to above, deeper yellow blossoms
	Lutea-Viridis. Green mats with yellow blossoms
	of blue-grey. Yellow blooms
	Petraschi. Choice little silvery cushions, large white blossoms in very early spring
	Rocheliana. Silvery rosettes with neat little blossoms of creamy white
13	plants forming rosettes with limey encrustations. Most all bloom in May and June, and prefer heat and plenty of chip rock.
	Aizoon. Easy and good
	Baldensis. Compact little mats, with delightful little white blossoms
	Cartilaginea. Distinct and rare. Stiff rosettes carrying stems of flowers of pinkish white
	Cochlearis. Choice little mat of platinum grey, red- stemmed sprays of large snow-white flowers
	Stems of two feet or more with branching sprays of white dotted red, giving pink effect
	Cotyledon Pyramidalis. Lovely ample rosettes of grey- green, with large sprays of lovely white blooms75 to
	Flavescens. Hybrid with beautiful yellow blossoms
	spotted white

Hostii. Rare species, beautiful rosettes of narrow grey leaves
Lingulata. Loose spidery rosettes of long narrow leaves, encrusted with lime, from which rise lovely plumes of white
Lingulata Lantoscana Bellardi. This is a distinct variety, preferring a little shade
Densa. Compact grower. Larger than the little Baldensis
LaGaveana. Small edition of the Aizoon. Creamy white flowers
Andrewsii. Hybrid between Geum and Hostii. Ample green foliage with slver encrustations and splendid white flowers
MacNabiana. Easy and good. Medium rosettes heavily encrusted with white flowers spotted crimson
Pectinata. Hybrid between Aizoon and Incrustata. Flat- tened rosettes heavily silvered
OSSY SECTION:
Bathionensis. Good bloomer and one of the best of the
colored ones. Deep pink
Decipiens Roses
Decipiens Alba
Wallacei. Large white mossy. Good
Guildford's Seedling. Bright crimson, one of the best
H. S. Stokes. Red.
Schoen Von Ronsdorf. Deep red, very choice
Red Admiral. The best mossy
Sir Douglas Haig. Choice red, or deep crimson
Cotswold Cream. Lovely cream, rich coloring, dark
green foliage
ORPHYRION SECTION
Oppositifolia Splendens. This is an early bloomer with
lovely purple blossoms. Very rare and choce
Cunneafolia. A tiny London Pride, with dainty pink
flowers in early spring.
Primuloides. Elliott's Variety. Tiny compact London Pride
EDUM (Crassulacea)
Acre. Evergreen mat with vellow flowers

N

5

Album Murale. Light green sausage-shaped foliage, pink- fish white blossoms
Anglicum. Neat growing. Grey-green mat with white flowers. True form
Brevifolium. Choice little Sedum, with white flowers
Dasyphyllum. Choice little grey blue heads throwing up sprays of softest pink. One of the best
Ewersi. Grey blue succulent leaves rather trailing habit, foliage turning rose in fall; rose blossoms
Hispanicum. Grey green and misty. Very attractive
Kamschaticum. Native succulent grey-green foliage
Lydium. Bright green turning to red
Nevii. Rare little plant, loose mats of green and lovely white flowers
Middendorfianum. Choice, shrubby
Pruniatum Fosterianum. Spiny foliage turning bronze in fall
Sarmentosum. A questionable associate for anything choice; very desirable, however, on hot bank in full sun
Murale Coccineum. Very lovely little Sedum, dark foliage
Sexangular, Low growing Sedum, Yellow flowers
Spurium Album. Neat and fine
Spurium Coccineum. Grandiflora. Large rose flowers, one of the best
Pilosum. Remarkable little rosettes, with choice little pink blossoms
Pulchellum. Star-shaped Sedum, prefers shade, pink blossoms
Sieboldi. One of the best. Blue-grey foliage, rose blooms
Reflextum Cristatum. Fan-shaped Sedum, developing into attractive little plant as season advances
EMPERVIVEN (Crassulacae). I have many varieties of
this attractive little rock plant, but am not sure that all are named correctly. I give a list of those I am
sure of.
Arachnoideum. The tiny cob-web houseleek
Blandum Rubicundum
Doeleanum. Attractive bi-colored rosette
Globiferum. Resembling tight little globular rosettes

S

Brownii. Choice shaded variety, sharp tips	.25 .30 .25 .40
HORTIA (Dispendiacae) Galacifolia. A most charming delicate evergreen, turning bronze in fall. Flowers delicate pink	.50
LENE (Caryphyllacae) Acaulis. Delicious little emerald-green cushion with the most delicate little pink flowers; in June-July Hookeri. Lovely native of California and Oregon. Luscious pink blossoms in early summer	.40 .50
Shafta. A fall bloomer, deep rose flowers	.35
SYRINCHIUM (Iridacae) Angustifolium. Blue-eyed grass	.25
OLDANELLA (Primulaceae) Alpina. Delightful high Alpine. A beauty with violet flowers	1.00
YNTHYRIS (Scrophularicacae) Rotundifolia. Blooms early in the spring; lilac Reniformis. Larger form of the above, more choice, with	.35
kidney-shaped leathery leaves, and fluffy spikes of clear lavender-blue in early spring	.40
EUCRIUM (Labiatae) Chamaedrays. Glossy leathery leaves with rose flowers.	.35
HYMUS (Labiatae) Serpyllum Alba. Sweet-scented creeping thyme, choice	
little ground cover, white blossoms	.25
Serpyllum Coccineum. Red blooming kind of above	.25
B. Serpyllum Rosea. Delightful little rose-colored blooms	.30
Lanuginosa. Woody evergreen carpeter, of softest grey.	.25
ERONICA (Scrophulariacae) Amethystina. Light lavender, dainty flowers. Profuse	
bloomer	.30

S

S

Erica. Resembling spire of rose heather, 9 inches
blue flowers with white eye
Incana. Silvery foliage with deep blue spikes. Good in rock wall
Incana Glumaceum. This is New Zealand shrub variety Delightful little leathery leaves of softest grey
Hectori. Another odd little shrub from New Zealand. Very choice, and is evergreen.
Rupestris (Prostrata). Pretty trailing and mat-forming plant with abundant sprigs of lovely Gentian blue, lovely white eye
Repens. Good ground cover; China blue flowers
Saxatilis. Forms neat little bushes. Shiny foliage and deep blue flowers. One of the best
Teucrim Trehani. Yellow foliage, delightful bright blue flowers; a lovely color scheme in itself
IOLA (Violacaea)
Arenaria Rosea. Dear little tufted violet of the loveliest rose color. Splendid bloomer
Apricot. Good bloomer, of a rare apricot shade
Bosniaca. Dainty little deep rose viola from Central
Calcaratta. This is the rare little Alpine of the Upper Mountain regions. True to type, comes lavender and yellow
Gracilis. The delicious little Grecian Viola, flowers of intense deep purple. This is the true Gracilis form
Haselmere. Delightful lilac-pink. Constant bloomer, appreciates a little shade
Jersey Jem. Desirable Viola of deep purple; fragrant
Pedata. Bird's foot Viola, large pale lavender blooms
Pedata Bi-Color. Glorious form of the above, with the upper petals much deeper purple than the three
lower ones
Mauve Queen. Bedding Viola, lovely mauve shade, good in formal garden for ground cover for roses.
Maggie Mott. Charming Mauve Viola, diffused white near the dainty eye. Bare in good types

Viola	.50
Snow Bird. Dainty pure white Viola with yellow eye	
WAHLENBERGIA (Campanulacae)	
Serpyllifolia. Lovely plant from Dalmatia. Large beau-	
tiful purple bells in July. Good wall plant	.50
Gramnifolia. Similar to above, greyish foliage	.50
Kitabeli. Similar but shorter leaves and hairy. Good	.75
BOTANICAL TULIPS AND SPECIES, and a class of Tulips	

recommended for rock garden culture.

Clusiana. Carmine-rose, with white border, long lank flowers.

Eichleri, Brilliant scarlet, very tall flower.

Greigi. Fiery orange-red, typical brown spots on leaves. Kaufmanniana (Waterlily Tulip). Sulphur yellow.

Linifolia. Brilliant scarlet, very dwarf.

Marjoletti. Soft yellow, margined red, little elegat flower.

Praestans. Brilliant vermilion, several flowers on one stem. Praestans, Orange red, short stemmed.

Viridiflora, Green, edged yellow, peculiar color, Different,

Prices of the above on application.

Also I have a few of the dwarf Narcissi. Bulbocodiums, etc., and can supply any quantity of the little Scilla, Chinodexas, Muscari, Galanthus, etc.

Write me for list of native wildings. I have many choice varieties.

NOTE

This little catalogue will, no doubt, reach the hands of many enthusiasts who are well acquainted with its contents, but I want those who are not so well informed to feel free to write me for any information they may desire with regard to the building of their rock gardens, soil, etc., and I should be only too happy to give special instructions and requirements regarding any of the plant material listed herein. I sincerely wish to feel that my customers are also my friends.

I have many varieties in too small a quantity to list. If there is something you are looking for and do not see in my catalogue, write me. I may not have it, and if not, would be happy to get it for you, if possible.
